Network & Structured Cabling Solution

Integrated Audio & Video System

Wi-Fi & Wireless Network Security

SMATV & IPTV Solution

Public Address & Audio Visual Solution

IT Hardware Solution

## **CLOSED CIRCUIT TELEVISION SYSTEMS SOLUTION.**

CCTV (Closed-circuit television) is a tv system in which signals are not publicly distributed but are monitored, primarily for surveillance and security purposes. CCTV relies on strategic placement of cameras and private observation of the camera's input on monitors

## **PABX SYSTEM**

PABX works like a mini version of a public telephone exchange. A typical system has both software and hardware. These include telephone units, routers, fax machines, modems, hubs, adapters, and switches. With PABX, a company can run its own internal phone network using local extension numbers

## **POINT-TO-POINT NETWORK SECURITY**

Point-to-point connections are typically used to connect two systems together over a wide area network (WAN). You can use a point-to-point connection to get data from your local system to a remote system or vice versa. The systems that require point to point connection includes telephone lines, digital cable, mobile phone networks, rink line, fiber optics, and radio signals.

## **PARKING GATE BARRIERS**

Barrier gates, or parking gates, are a very common parking solution. These ensure that every person that goes in or out of the premises is been authorized by the organization.

## **COMPUTER NETWORKING & NETWORK CABLING**

Network cables are like veins in the human body. They are carriers that allow data to flow from one place To another. Network cables are the infrastructure of your business

- ◆ Personal Area Network (PAN)
- ◆ Local Area Network (LAN)
- ◆ Wireless Local Area Network (WLAN)
- ◆ Metropolitan Area Network (MAN)
- ◆ Wide Area Network (WAN)
- ◆ Storage Area Network (SAN)
- ◆ Virtual Private Network (VPN)

## **POINT OF SALE SYSTEMS**

A point of sale, or point of purchase, is where you ring up customers. When customers check out online, walk up to your checkout counter, or pick out an item from your stand or booth, they're at the point of sale. Your point-of-sale system is the hardware and software that enable your business to make those sales.

## **TELECOM NETWORKING**

A telecommunications network is a group of nodes interconnected by telecommunications links that are used to exchange messages between the nodes. The links may use a variety of technologies based on the methodologies of circuit switching, message switching, or packet switching, to pass messages and signals

## STRUCTURED DATA CABLING

A structured cabling system is a complete system of cabling and associated hardware, which provides a comprehensive telecommunications infrastructure. This infrastructure serves a wide range of uses, such as to provide telephone service or transmit data through a computer network

## WI-FI & WIRELESS NETWORK SECURITY

Wireless network security is the process of designing, implementing and ensuring security on a wireless computer network. It is a subset of network security that adds protection for a wireless computer network.

## VIDEO AND AUDIO DOOR ACCESS

Video & audio door entry systems allow the user to speak with a visitor without opening the door.

These advanced systems can include one or more outdoor entry panels connected to a number of indoor handsets.

## PUBLIC ADDRESS AND AUDIO-VISUAL DISTRIBUTION SOLUTION

PA system consist of various components such as mixing console, amplifiers and loudspeakers for music as well as speech, it has the capability to use a sound source, as a recorded music or a person delivering speech and distributing the sound through- out the addressed venue or building. Public address system is very important and compulsory for the small and large venues like school auditoriums, malls, train / metro / airport / bus terminals. In simple terms, public address system is required to make announcements in public, institutional and Commercial buildings

## ACCESS CONTROL SYSTEM SOLUTION

Access control is a security measure, which is put in place to regulate the individuals that can view, use, or have access to a restricted environment. Various access control can be found in the security systems in our doors, key locks, fences, biometric systems, motion detectors, badge system, and so forth

## SMATV AND IPTV DISTRIBUTION NETWORKS SOLUTION

SMATV is Single Master Antenna Television (or Satellite Master Antenna Television); the purpose of SMATV is for supplying and controlling the number and type of channels to multiple televisions

## SPECIALITIES

**Get started with AMCs today with us.  
(Annual Maintenance Contract)**

Customers satisfaction is our priority and thus we sign the contract and our clients appreciate amcs because they protect their investments in products and services, ensure against unplanned downtime, and guarantee that they will always have a service professional within arm's reach.

## There are so many benefits to implementing annual maintenance contracts here are few

- ◆ We provide our immediate visit to all our AMC clients in 12 hrs time & provide solution within 24hours time Maximum.
- ◆ Having regular maintenance planned for ahead of time. Well-maintained things break less frequently, resulting in less work for your techs and less downtime for clients.
- ◆ Guaranteed access to maintenance support at any time & Extended equipment life

# OUR BRANDS & PARTNERS
